

High Stiffness Flexural Frame- 300 KN

Description:

3000 KN capacity high stiffness flexure frame to test specimen up to 150x150x750 mm flexural beam complete with rollers conforming to IS standards

Features:

- load capacity 300kN;
- Piston travel 100mm
- Piston travel switch
- Structure can be opened on one side for easy specimen loading

- Safety switch preventing machine use with structure opened

Standards:

- ASTM C1550
- EN14488-5
- ASTM C1609, ASTM C1018
- EN14651

Products:

FT030C

High stiffness 300 KN cap. Flexure frame.
