

Link - Lab Software

Description:

LinkLAB is CONTROLS' new proprietary Laboratory Connectivity Package.

It allows your AUTOMAX Pro to be a connected part of your laboratory infrastructure by taking inputs from any number of ancillary measuring systems and devices increasing efficiency and eliminating transposing errors.

50-KLINK/ E

Link-LAB Enterprise laboratory connectivity package for machines controlled by PC via DATAMANAGER Software.

It allows:

- Seamless device integration of dimensional measuring stations, calipers, weighing systems, barcode readers and video cameras. Compatible devices not included (to be ordered separately)
- Direct acquisition of sample weight, dimensions, identification number and test execution video
- Direct use of data in several formats such as txt, excel, pdf, access
- Raw data export to the Laboratory Information Management System (LIMS) or laboratory/corporate ERP systems

50-KLINK/L

Link-LAB Local laboratory connectivity package for PILOT and AUTOMAX PRO, PRO-M machines. Note: caliper and barcode cannot be both connected on the compression machine.
